Input data	One morning, when Gregor Samsa woke from troubled dreams, he found himself transformed in his bed into a h orrible vermin. He lay on his armour-like back, and if he lifted his head a little he could see his brown belly, sligh tly domed and divided by arches into stiff sections. The bedding was hardly able to cover it and seemed ready t o slide off any moment. His many legs, pitifully thin compared with the size of the rest of him, waved about hel plessly as he looked. "What's happened to me?" he thought. It wasn't a dream. His room, a proper human room although a little too small, lay peacefully between its four familiar walls. A collection of textile samples lay spre ad out on the table - Samsa was a travelling salesman - and above it there hung a picture that he had recently cut out of an illustrated magazine and housed in a nice, gilded frame. It showed a lady fitted out with a fur hat a nd fur boa who sat upright, raising a heavy fur muff that covered the whole of her lower arm towards.

Input data	Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind te xts. Separated they live in Bookmarksgrove right at the coast of the Semantics, a large language ocean. A small river named Duden flows by their place and supplies it with the necessary regelialia. It is a paradisematic count ry, in which roasted parts of sentences fly into your mouth. Even the all-powerful Pointing has no control about the blind texts it is an almost unorthographic life One day however a small line of blind text by the name of Lore In Ipsum decided to leave for the far World of Grammar. The Big Oxmox advised her not to do so, because there were thousands of bad Commas, wild Question Marks and devious Semikoli, but the Little Blind Text didn't list en. She packed her seven versalia, put her initial into the belt and made herself on the way. When she reached the first hills of the Italic Mountains, she had a last view back on the skyline of her hometown Bookmarksg

Input data	But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the tr uth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is plea sure, but because those who do not know how to pursue pleasure rationally encounter consequences that are e xtremely painful. Nor again is there anyone who loves or pursues or desires to obtain pain of itself, because it is pain, but because occasionally circumstances occur in which toil and pain can procure him some great pleasure. To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no anno ying consequences, or one who avoids a pain that produces no resultant pleasure? On the other hand, we deno unce
